Notes:

- Items in **blue** text are NOT part of the PowerEdge configuration that can ordered if purchased directly from Dell.
- GMS software version 3.2.2 (or newer) is required for support of acquisition equipment in Windows Server 2016.
- If the specific hardware device configuration requires more expansion slots (or a different type) than what is available on the motherboard, an Expansion Enclosure System will also need to be purchased:

PCI Express to 2 PCI & 2 PCIe Expansion Enclosure System – Full Length
